

A CLEAR SOLUTION FOR IMPROVED
FILTRATION PERFORMANCE™

Ultrafit® Welded 100 and 500 Liquid Filter Bags

- No Sewn Seams ... *fully welded construction eliminates solids bypass*
- Patented **Zero-Bypass™** Collar... *provides an absolute compression seal*
- High Efficiency Performance... *achieves consistent results through precise particle removal*
- Graded-Density, Composite Layer Design... *promotes full-depth filtration and enhanced solids loading*
- Non-Woven Polypropylene... *spunbond and melt-blown microfiber, absolute-rated, FDA compliant*

The Bottom Line

Improved performance does not have to cost more. **Ultrafit** Welded Liquid Filter Bags provide superior filtration at prices far below other high performance disposable filters and cartridges.

A FUSION OF DESIGN AND TECHNOLOGY –

Using our patented ultrasonic laminating process, **Ultrafit** Welded Liquid Filter Bags set new standards for high performance liquid filtration. Composite layers of graded-density, melt-blown polypropylene microfibers provide optimum efficiency and enhanced solids loading. Compression of the unique **Zero-Bypass** collar by our vessel lid eliminates solids bypass, keeping unfiltered liquid upstream where it belongs. **Ultrafit** Welded 100 and 500 Liquid Filter Bags are manufactured by **Filtration Systems**.
